Vision

How Is This App Useful?

Collaboration And Connection

Jesse Forte envisioned this project in his senior thesis at New Mexico State University as a journalist. With no serious background in technology, he waited until the bootcamps started to connect with his team and see if this was a possibility of creating. Our team saw the importance of connecting entrepreneurs with companies that align with their passions. With so many different companies, it's important to know the cultural aspects, have an understanding for the leaders of the foundation and make sure your interest align with what the company is about.

Business

Our company has partnered with entrepreneurs around the world, businesses in every corner of the world and the top millennial platforms to ensure true success for founders and them. To make this experience top notch, we implement the best people, companies and opportunities. Customers get the App for free but pay for the positions they accept and commit to for a 3 month period. Once you have decided on a company and the position to fill, we then package the entire experience so that you can worry about the excitement of working with a new team.

Philanthropy

Our team has a dedicated partnership with specific brands such as RICHT, Red Cross, Ubelong and Autism Speaks to create awareness for open volunteer work.

We make sure that every person gets what they need and we help those out who don't have support.

Connect/

Collaborate

Once you have connected with a business of your interest, you will have a moment to collaborate, ask them questions and provide any feedback in real time. This step gets you closer to your new position!
