NOTES

1. Summary of significant accounting policies

Nature of business: DownToDash, Inc. was organized in the state of Delaware on May 16, 2019, and operates out of New York City. The corporation develops and operates a location-based social mobile application that informs users of activities happening nearby and connects them with other users interested in the same activities.

Management's plans: The management's strategic objectives for 2020 and beyond is focused on increasing the user base and engagement with the platform. This objective will be achieved through organic growth, media relations, and other marketing efforts. The management believes that its financing activities will enable the business to continue its operations for a reasonable period of time. The management's long-term vision is to be a leader in enabling people to meet activity partners, with a focus on user safety.

Basis of accounting: The accompanying financial statements have been prepared on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States ("GAAP") as determined by the Financial Accounting Standards Board ("FASB") Accounting Standards Codifications.

Use of estimates: The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Income taxes: The entity is treated as a corporation for federal and state income tax purposes and taxable income is to be taxed at the entity level. Considering the significant uncertainties with respect to the corporation's future profitability, no deferred tax asset has been recognized.

Income tax uncertainties: The corporation follows the FASB guidance for how uncertain tax positions should be recognized, measured, disclosed and presented in the financial statements. This requires the evaluation of tax positions taken or expected to be taken in the course of preparing the corporation's tax returns to determine whether the tax positions are "more-likely-than-not" of being sustained "when challenged" or "when examined" by the tax authorities.

Subsequent events: The management has evaluated subsequent events through March 5, 2020, and has determined that there are no subsequent events required to be reported on the accompanying financial statements.

2. Intangibles

Intangible assets consist primarily in custom software code developed by third-party providers that is stated at cost.

NOTES - Continued

3. Short-term liabilities

Short-term liabilities consist of progress billing owed to third-party providers.

4. SAFE capital

Simple Agreement for Future Equity are agreements between the company and investors in which the company promises a future equity stake if certain trigger events occur.
